Subject: Formaldehyde assessment: Supplemental Information attached

Hello again, everyone - Attached you will find the Supplemental Information file for Formaldehyde. Please read Andrew's note below for information about the state of the file.

Ex. 5 Deliberative Process (DP)

When your disciplinary workgroup has developed its recommendations, please send them to Barbara Glenn and Andrew Kraft, with copies to David Bussard, Gina Perovich, Charlie Ris, Bob Sonawane, and also to me so I can keep track of the progress of the section reviews.

Thank you again for your help in reviewing this assessment that is critical to the IRIS program.

Subject: RE:

Please find attached the file containing the Supplemental Information to the formaldehyde Toxicological Review. Similar to the TR, this document has numerous comment bubbles, including materials in process and yet to be inserted.

Ex. 5 Deliberative Process (DP)

For both the TR and appendices, it would be useful to suggest the reviewers use the "Document Map" feature to "drive" around these large documents more quickly and effectively (this feature is located under the "View" tab in Word). In addition, in both the TR and Supplemental materials, the Table of Contents, Figures List, and Tables List should all be updated and active with (cntrl+click) links to the relevant text.

Regards,
Barbara and Andrew

PS: It remains unclear how the recent Endnote + Litciter updates pushed to all personnel will affect performance (as portions of both documents have been "HEROized")
